In the offer of e-bikes MOUNTAIN, CROSS, TREK, CITY, FOLD

For each model you can choose **several types of batteries** with different capacities and ranges – **at least two, some even four!**

As well as super-premium electric bike models with **SHIMANO** motors

MTF

On our **ELECTRIC BIKES** you can e.g. find:

- Batteries **SAMSUNG** and **SHIMANO**
- New mid-drive motors **SHIMANO** and **BAFANG M510**
- Hydraulic disc brakes **SHIMANO**
- Gears **SHIMANO Deore**
- Air forks **ZOOM VAXA**
- Colour **LCD displays** with USB charging
- Five levels of motor support

THE MOST POWERFUL integrated BATTERIES ON THE MARKET
with a capacity of **25 Ah!**
Range up to 200 km!

website 
Full range of electric bikes also on
www.mountfield-export.com

So, what other news can you look forward to?

We present you with our comprehensive offer of **MTF e-bikes** for the year **2023**. A total of **76 models** of e-bikes for men and women, in different frame sizes, in exclusive designs, with mid and rear motors, with optional batteries.

This season, you can also choose from several types of batteries for electric bikes (at least two, and now up to four for some models), which differ in capacity and range per charge, for greater convenience. Choosing **the most powerful integrated battery on the market with a capacity of 25 Ah** will allow you to travel **up to 200 km** on a single charge!

MTF electric bikes feature a range of premium components such as batteries **Samsung**, **Shimano**, new mid-motors **Shimano Steps EP8**, **Bafang M510**, **M410**, hydraulic disc brakes **Shimano**, suspension forks **ZOOM Vaxa** (air) and **SR Suntour**, premium tyres **Maxxis**, colour LCD displays with USB charging and much more.

MTF e-bikes are assembled exclusively in the Czech Republic and Taiwan. Everything is highly skilled manual labor carried out under the supervision of our staff. During assembly, all components are checked several times for functionality, including the wiring of the entire electrical system.

New SHIMANO AND BAFANG motors

This year, you can also find new mid-motors on our selected mountain, cross and trek e-bikes.

The range includes models with premium Shimano Steps EP8 motors and the new M510 and M410 motors from Bafang.

Shimano Steps EP8

Compared to its predecessor, the use of a magnesium alloy on the motor body has reduced the weight by 300 g to an incredible 2.6 kg. Torque has been increased to 85 Nm and internal resistance has been reduced by 36%. As a result, the engine offers almost no resistance when driving without assistance. The software has also changed. For each riding mode (ECO, Trail, Boost plus Walk mode for assisted e-bike handling), the level of assistance, torque and motor response speed can be individually set. You can also set up two different profiles for this engine in case you are sharing it. Everything can also be controlled via the Shimano E-Tube mobile app.

Bafang M510

The most powerful motor in its class with a maximum output of 750 W. It is 20% more powerful than its closest competitors. It has a torque of 95 Nm – and that's a lot of torque! Maximum cadence support is extended to 120 rpm. It is half a kilogram lighter than its predecessor M500, weighing 2.9 kg. Weight has been reduced thanks to several design changes, most notably a new magnesium housing. The engine software has been reconfigured for smoother starts. The sensitive torque sensor helps to make the power delivery smoother and more natural. The engine optimally doses power according to the rider's pedalling force. You'll appreciate the smooth, jerk-free operation, especially in steep hills or short turns. The number of levels of motor assistance remains at 5.

Bafang M410

This motor is an improved version of its predecessor called M400, also well known as Max Drive. This motor delivers a maximum power of 500 W and has a torque of 80 Nm. Compared to the M400 engine, its successor is 18% more powerful. The weight was also reduced here (to 3.4 kg). This is the most commonly used mid-drive, which also has the advantage of a slightly lower price. Thanks to the torsion sensor, it delivers power smoothly, which you'll appreciate especially on harder uphill.

Mountain MTF e-bikes

E-bikes MOUNTAIN

E-bikes MOUNTAIN

Premium components, top engines

E-bikes are especially suitable for off-road and cycling paths. The offer will satisfy everyone: from the adrenaline junkie to those who prefer a more touristic approach to riding an e-bike.

We offer only electric bikes with mid-drive motors. Two models feature premium **Shimano Steps EP8** motors; the others include, for example, the most powerful motors from Bafang M510 with a maximum power of 750 W and a torque of 95 N.m or another new addition to the range, the M410 motors.

Because they are used in more difficult terrain, emphasis is placed on the selection of quality components. For example, you can rely on air forks **ZOOM Vaxa** with 120 mm travel, lockable from the handlebars, hydraulic disc brakes **Shimano BR-MT 401**, 11-speed derailleurs **Shimano Deore**, tyres **Maxxis** and more.

In addition to the classic fixed-frame e-bikes, the Xtreme 9.4 full-suspension carbon model is also available for those who want maximum comfort when riding off-road. You can choose electric bikes for men and women, in frame sizes from 16" to 21" with wheels with a diameter of 27.5" or 29".

Among MTF e-bikes, you can also find for the first time a model in the SUV category, which has been on the rise lately. It is a mountain e-bike with geometry adapted for the mounting of mudguards with a rack, which are fitted to the bike from the factory.

Premium mid-motors **Shimano Steps EP8** and **Bafang M510**.

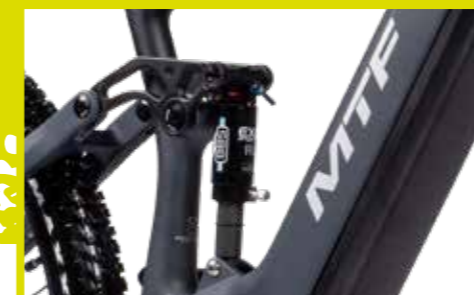

XTREME 9.4 – full suspension carbon

Mid-motor **Bafang M510**

SAMSUNG BATTERIES TO CHOOSE FROM: 1 **14 Ah** (600 Wh) – RANGE up to 120 km 2 **10 Ah** (430 Wh) – RANGE up to 80 km

All-suspension carbon e-bike for demanding users who want to enjoy riding on difficult terrain. Wheel diameter **29"** | Frame size **19"** and **21"** | Shifters **Shimano Deore RD-M5100** | Shifting **Shimano Deore SL-M5100**, 11 speeds | Air fork **ZOOM VAXA RLO Air**, 120 mm travel, lockable from handlebars | Rear shock absorber **ZOOM EXA 588RL**, 150/33 mm, air | Hydraulic disc brakes **Shimano BR-MT401** | Tyres **Maxxis Rekon 29 x 2.40** | Saddle **MTF NoPressure Sport** | Controls on **colour LCD display** (5 levels of assistance)

Women's mountain e-bike with Bafang M200 mid-motor suitable especially for cycling trails and paved roads. Wheel diameter 27.5" | Frame size 16" and 18" | Shifters Shimano Altus RD-M2000 | Shifting Shimano Altus SL-M2010, 9 speeds | Suspension fork SR SUNTOUR XCT HLO, 100 mm travel | Hydraulic disc brakes Shimano BR-MT201 | Tyres CST Patrol 27.5 x 2.40 | Saddle MTF NoPressure Sport | Controls on clear LCD display (5 levels of assistance) | Free kickstand

Cross MTF e-bikes

Off-road and on-road. Versatile use.

Cross electric bikes are suitable for both off-road and on-road use. They're great to ride on bike paths or paved roads, and fit well on the road thanks to the narrower tires. Their use is simply broad. You can easily attach a rack and fenders to both men's and women's 28" cross bikes.

You'll find rear hub motors, hydraulic disc brakes **Tektro**, shifters **Shimano Altus**, suspension forks Zoom, suspension seats or **colour LCD displays**. These are electric bikes more suitable for tourist style riding and relaxed trips.

Here, too, you can choose from several battery types with different capacities and ranges (up to 200 km). All are fully integrated into the frame.

Convenient control

Colour LCD display you set the level of engine support on it and it also serves as a bike computer.

CROSS 4.4

Motor Bafang in rear hub

SAMSUNG BATTERIES 1 **14,5 Ah** (522 Wh) – RANGE up to 110 km 2 **17,5 Ah** (630 Wh) – RANGE up to 140 km
TO CHOOSE FROM: 3 **20 Ah** (720 Wh) – RANGE up to 160 km 4 **25 Ah** (900 Wh) – RANGE up to 200 km

Men's cross electric bike with universal use. Ideal for lighter terrain and on the road. Wheel diameter **28"** | Frame size **18"** and **20"** | Shifters **Shimano Altus RD-M310** | Shifting **Shimano Altus SL-M315**, 3 x 8 speeds | Shifter **Shimano Tourney FD-TZ510** | Suspension fork **ZOOM**, 50 mm travel | Hydraulic disc brakes **Tektro HD-E350** | Tyres **CST 700 x 45C** | Saddle **MTF Comfort man** | Controls on **colour LCD display** (5 levels of assistance) | Free kickstand and lights

CROSS 4.4 W

Motor Bafang in rear hub

Women's electric cross bike with lowered top tube and easy entry. Wheel diameter **28"** | Frame size **17"** and **19"** | Shifters **Shimano Altus RD-M310** | Shifting **Shimano Altus SL-M315**, 3 x 8 speeds | Shifter **Shimano Tourney FD-TZ510** | Suspension fork **ZOOM**, 50 mm travel | Hydraulic disc brakes **Tektro HD-E350** | Tyres **CST 700 x 45C** | Saddle **MTF Comfort lady** | Controls on **colour LCD display** (5 levels of assistance) | Free kickstand and lights

Trek MTF e-bikes

E-bikes TREK

E-bikes TREK

Comfortable trips with maximum comfort

For all those who want to enjoy cycling in the saddle of an electric bike. These are bikes for lovers of relaxed trips, especially on cycle paths and paved roads. Trekking e-bikes are great on asphalt, but not suitable for heavy terrain. They are fully equipped for recreational riding: mudguards, lights, rack or practical stand. Everything is included in the price of the e-bike, you don't have to buy anything extra.

We offer electric bikes with mid (**new Bafang M410**) and rear drives, premium components, optional batteries **Samsung**. For each trekking model, you can choose from four battery types with different capacities and ranges. When choosing **25 AH battery, the range is up to 200 km!**

We have trekking e-bikes for men and women, in different frame sizes. All have a wheel diameter of 28". The frames are designed to make the ride as comfortable as possible. On the women's models, the top frame tube is lowered, making it easy to get on.

Optimal power dosage

New Bafang M410 mid-drive motor with 80 Nm of torque can be found on the 6.4 series trekking electric bikes.

ROAD 6.4

Mid-motor Bafang M410

SAMSUNG BATTERIES TO CHOOSE FROM:

Motor Bafang in rear hub

City MTF e-bikes

Comfortable rides through towns and villages. For shopping or a short trip.

Comfortable e-bikes for all generations, including seniors. They are at home on asphalt roads, suitable for city and countryside driving. You can use them reliably to go on a small shopping trip, a visit or a shorter relaxing trip without any stress. You can choose electric bikes **with both mid and rear motors**, with a wheel diameter of 28" or 26". For men and women.

All city e-bikes have comfortable saddles and a rack where you can attach a shopping basket. In the equipment you will also find **mudguards, lights, bell, practical stand or leather grips** for a more comfortable grip. The lack of a top frame tube makes them much easier to climb on.

Some models have the battery fully integrated in the frame, others are mounted on the carrier. Even with city e-bikes, you can choose from several types of batteries with different capacities and ranges.

Mid-engined for the city

Even among city electric bikes, you will find models with a mid-motor, namely the **Bafang M200**.

TOUR 5.4

Mid-motor Bafang M200

SAMSUNG BATTERIES TO CHOOSE FROM: 1 **14,5 Ah** (522 Wh) – RANGE up to 110 km 2 **10 Ah** (360 Wh) – RANGE up to 60 km

Folding MTF e-bikes

E-bikes FOLD

E-bikes FOLD

They fit everywhere. Convenient and foldable in no time.

Folding bikes are gaining popularity in the electric bike segment. They are for everyone who wants a compact and comfortable electric bike for short rides. **For everyone from teenagers to seniors, men and women alike.** Just for everyone. These e-bikes can navigate through city traffic and are perfect for getting to work, school, or even a little shopping.

All models **have a carrier for attaching a basket, and a practical kickstand** when you want to park your bike for a while. The folding and unfolding of these electric bikes is very easy and takes only a moment. Anyone can do it. The folding bikes are particularly suitable for asphalt and paved roads. They are very easy to get on, which is why they are in demand even among the elderly and people of smaller stature. They are also popular with caravan or motorhome owners who take folding electric bikes with them on the road.

Choose from models with the battery fully integrated in the frame or behind the seat. For each, you can choose from two battery types with different capacities and ranges for added convenience.

Can be folded in a flash

The **folded electric bike** can be easily transported in the boot of a small car.
